

When the G20 comes to town on Sept 23-25, many issues will be on the table. One that will not be discussed is global health.

As millions of people go without HIV treatment,

and drug resistant TB continues to spread out of control,

and malaria prevention programs close their doors...

WHY ARE G-20 NATIONS REFUSING TO KEEP THEIR PROMISES TO FIGHT AIDS?

G-20 member nations made promises to fight AIDS around the world. But the financial crisis has given them an excuse to go back on those promises, putting millions of lives at risk worldwide. The G-20 nations must keep their promises to fight AIDS around the world.
